

PUENTE PROYECT

REGENERATIVE INTERCULTURAL FASHION

PUENTE PROYECTO

THE PROYECTO

PUENTE, is a labor program designed with the objective of providing employability to the Chilean and migrant population, specifically to women who do not have a permanent job.

We want to link textile design and manufacturing, through the concept of UPCYCLING, which consists of designing and creating unique and new garments, using reused garments.

WITH THIS PROGRAM WE ARE LOOKING FOR:

- Train in design and textile manufacturing, delivering work tools to unemployed people.
- Generate instances of textile co-creation, sharing experiences and visions of complementary design.
- Achieve labor links that expand our empathy.
- Workshops with facilitators and producers
- Interculturality
- Articulate organizations and companies that require products made in a regenerative way.
- A small community of migrants as part of the productive and circular process.

REGENERATIVE FASHION DRESS CONSCIOUSLY

Help us carry out this program and participate in our Crowdfunding campaign, buying any of our products resulting from the designed manufacture. In the current context that Chile is experiencing, **UPCYLCING** is a tool to generate collaborative formats that result in new types of circular economy.
